

## 3DEM-7 Announcement

March 2023

3DEM-7, the 7th International Symposium on Three-Dimensional Electromagnetics, will take place on November 13 to 15, 2023, at the University of British Columbia in Vancouver, Canada. The Hohmann-Wannamaker Trust is pleased to announce continuation of 3DEM this year, after a two-year lapse during the pandemic. The Department of Earth, Ocean and Atmospheric Science at UBC will be our local hosts for a seventh run of this ground-breaking series of presentations, poster sessions, and panel discussions devoted to the theory and practice of electromagnetic methods in pure and applied Earth science.

The Hohmann-Wannamaker Trust (HWT) was established in December 2022 as the continuation of the Gerald W. Hohmann Trust for Teaching and Research in Electromagnetic Geophysics, following the tragic death of trustee Phil Wannamaker in Salt Lake City on August 22. 3DEM-7 will be dedicated to honoring Phil's legacy in the worldwide EM community as a scientist, educator, colleague, and friend.

Those interested in attending 3DEM-7 can express their interest and get on the 3DEM-7 mailing list by completing an online form [HERE](#).
